Art Unit: 1746

### **DETAILED ACTION**

#### Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to an apparatus for cleaning a surface, classified in class 134, subclass 166R.
- II. Claims 7-11, drawn to an inspection camera, classified in class 134, subclass 201.
- III. Claims 12-15, drawn to a method for cleaning a surface, classified in class 134, subclass 22.1.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions having different effects, different designs, and different modes of operation.
- 3. Inventions III and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another apparatus such as one without an elongated conduit having an upstream first end and a downstream second end, and the apparatus as claimed can be used to practice another

Art Unit: 1746

process such as one without the step of introducing fuel and an oxidizer to a conduit and initiating a reaction of the fuel and oxidizer to produce a shockwave.

- 4. Inventions III and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions having different effects.
- 5. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 6. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 7. During a telephone conversation with William Slate on 8/1/06 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6.

  Affirmation of this election must be made by applicant in replying to this Office action.

  Claims 7-15 are withdrawn from further consideration by the examiner, 37

  CFR 1.142(b), as being drawn to a non-elected invention.
- 8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1746

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Specification

- 9. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
- 10. The abstract of the disclosure is objected to because it does not directed to an apparatus for cleaning a surface as claimed herein. Correction is required. See MPEP § 608.01(b).
- 11. The disclosure is objected to because of the following informalities: The specification, as originally filed, does not provide detailed description of Fig. 5.

Appropriate correction is required.

#### Claim Rejections - 35 USC § 112

- 12. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 13. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 7, "said source" lacks antecedent basis.

In claim 5, line 2, and claim 6, line 3, "the support member" lacks antecedent basis.

#### **Double Patenting**

14. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Page 5

Art Unit: 1746

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

15. Claims 1-2 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 11 of copending Application No. 10/801,215 (20050199743 A1). Although the conflicting claims are not identical, they are not patentably distinct from each other because the apparatus as claimed in both applications are functionally equivalent.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

16. Claims 1-3 and 5-6 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 8 of U.S. Patent No. 7,011,047 (Aarnio et al) in view of JP 59-219620 (JP'620) or Hong et al. (6,828,524). Aarnio et al. disclose an apparatus for cleaning a surface within a vessel as claimed.

Art Unit: 1746

The difference between the claimed apparatus and the apparatus as claimed in Aarnio et al patent, is that the Aarnio et al. claimed apparatus does not claimed the inspection camera apparatus.

- 17. JP' 620 discloses the inspection camera apparatus as claimed. See the abstract and figs. 1-2. Hong et al. disclose using inspection monitor (22) including a CCD camera to provide information as to whether the contamination is completely removed. See Fig. 3A, col. 4, line 66- col. 5, line 3.
- 18. It would have been obvious for one skilled in the art to use the inspection camera taught by JP'620 or Hong et al. in the Aarnio et al. apparatus to obtain the claimed apparatus and to enhance surface cleaning.

# Claim Rejections - 35 USC § 102

19. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 20. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Aarnio et al. (7,011,047).

Art Unit: 1746

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

# Claim Rejections - 35 USC § 103

- 21. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 22. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hunter (5,494,004) or Zilka et al. (2002/0112638) in combination with JP'620.

Hunter discloses an apparatus for cleaning the interior walls of a heat producing system. The reference discloses a source of fuel and oxidizer, the initiator and producing the shockwave as claimed. The reference discloses all limitation with the exception of the inspection camera as claimed. See col. 1, lines 8-10, 30-33, 51-59, and col. 4, lines 27-67.

Zilka et al. disclose a device and method for online explosives-based cleaning and deslagging of a fuel burning facility such as a boiler, ---. See the abstract. The

Application/Control Number: 10/733,606

Art Unit: 1746

reference discloses producing the shockwave as claimed. See paragraphs 3, 4, 21, 42, and 54.

Hunter and Zilka et al. do not teach that the cleaning apparatus includes an inspection camera.

JP'620 as discussed supra discloses using the inspection camera as claimed.

It would have been obvious for one skilled in the art to use the inspection camera taught by JP'620 in the Hunter or Zilka et al. cleaning system to obtain the claimed apparatus and to enhance surface cleaning.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zeinab E. EL-Arini whose telephone number is (571) 272-1301. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on (571) 272-1414. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 1746

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
